Art Unit: 2617

Response to Arguments

1. Examiner acknowledges receipt of arguments and amended claims filed on

8/1/2008. Claims 6 and 7 have been added.

2. Applicant's arguments with respect to claims 1-7 have been considered but are

moot in view of the new ground(s) of rejection. This action is made final.

Allowable Subject Matter

3. Claim 4 objected to as being dependent upon a rejected base claim, but would

be allowable if rewritten in independent form including all of the limitations of the base

claim and any intervening claims.

4. Claim 7 objected to as being dependent upon a rejected base claim, but would

be allowable if rewritten in independent form including all of the limitations of the base

claim and any intervening claims.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. The term "almost" in claim 1 is a relative term which renders the claim indefinite.

The term "almost" is not defined by the claim, the specification does not provide a

standard for ascertaining the requisite degree, and one of ordinary skill in the art would

not be reasonably apprised of the scope of the invention. Appropriate correction is

required.

6. The term "perculiar" in claim 2 is a relative term which renders the claim

indefinite. The term "perculiar" is not defined by the claim, the specification does not

Art Unit: 2617

provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. Appropriate correction is required.

Claim Rejections - 35 USC § 103

- 7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 8. Claim 1-3, 5 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Juijve (US 2005/0157971 A1).

Consider claim 1, Juijve discloses a communication portable terminal device (see Juijve, fig. 1, paragraph [0003]), comprising: a light source (see Juijve, paragraph [0118], fig. 17 item 152), disposed in a housing (see Juijve, fig. 1 discloses the housing for the light guide); and a light guiding panel, disposed in the housing for guiding a light from the light source (see Juijve, paragraph [0118], discloses a light guiding panel), wherein the light guiding panel includes: a light transmitting member having an almost plate like shape (see Juijve, paragraph [0136], fig. 27, discloses a plate shaped light transmitter), wherein the light transmitting member: an incident portion on which the light emitted from the light source is incident (see Juijve, fig. 17), and provided on a back face of the light transmitting member (see Juijve, fig. 17), and an emitting portion from which the light transmitted from the light source is emitted (see Juijve, fig. 17, item 152), and provided on a front face of the light transmitting member

(see Juijve, fig. 17); and reflecting units and the light emitted from the light source and incident on the incident portion and guiding the light to the emitting portion (see Juijve, fig. 17), wherein the reflecting units comprise a first reflecting unit and a second reflecting unit (see Juijve, fig. 17 and paragraph [0118], discloses a top and bottom reflecting unit), Juijve does not specifically disclose wherein the first reflecting unit is provided on the front face of the light transmitting member and the second reflecting unit is provided on the back face of the light transmitting member, however, when considering paragraph [0123], where Juijve discloses and suggest different placement of the light source, one of ordinary skill in the art at the time of the invention would have easily changed the location of the light source such that the first reflecting unit is provided on the front face of the light transmitting member and the second reflecting unit is provided on the back face of the light transmitting member and the second reflecting unit is provided on the back face of the light transmitting member.

Consider claim 2, the communication portable terminal device according to claim 1, Juijve discloses wherein the second reflecting unit includes a reflecting print portion having a peculiar color in a high reflectance on the back face side of the light transmitting member (see Juijve, paragraph [0145]).

Consider claim 3, the communication portable terminal device according to claim 1, Juijve discloses wherein the incident portion is formed in a curved concave on the back face of the light transmitting member arranged just above the light source (see Juijve, fig. 21 item 203).

Consider claim 5, the communication portable terminal device according to claim 1, Juijve discloses wherein the housing comprises a foldable structure, and includes: an

paragraphs [0156]).

upper housing having a liquid crystal display unit on an inner side surface thereof; and a lower housing having an operating key provided on an inner side surface thereof opposed to the inner side surface of the upper housing when the upper housing and the lower housing are set in a closing state, the lower housing being rotatably coupled to the upper housing through a hinge portion; and wherein the light guiding panel is disposed on an outer side face that is opposite to the inner side surface of the upper housing, and the emitting portion on the front face faces an outside (see Juijve, fig. 2,

Consider claim 6, the communication portable terminal device according to claim 1, Juijve discloses wherein the first reflecting member and the second reflecting member repetitively reflect the light emitted from the light source to propagate the light in the light transmitting member and to emit the light from the emitting portion (see Juijve, fig. 17).

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Application/Control Number: 10/567,479 Page 6

Art Unit: 2617

shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later

than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to VLADIMIR MAGLOIRE whose telephone number is

(571)270-5144. The examiner can normally be reached on Monday to Thursday, 8:00

AM to 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Nick Corsaro can be reached on 571-272-7876. The fax phone number for

the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a

USPTO Customer Service Representative or access to the automated information

system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
